

Bucharest

A NEW REALITY

THE 1.5 METER DISTANCE

Let's do this together.

In March 2020, a new world emerged. That means we have to adjust our way of living and working. We have to think about new rules to guarantee your and our safety. In this protocol, we describe 'the new normal' at Impact Hub Bucharest.

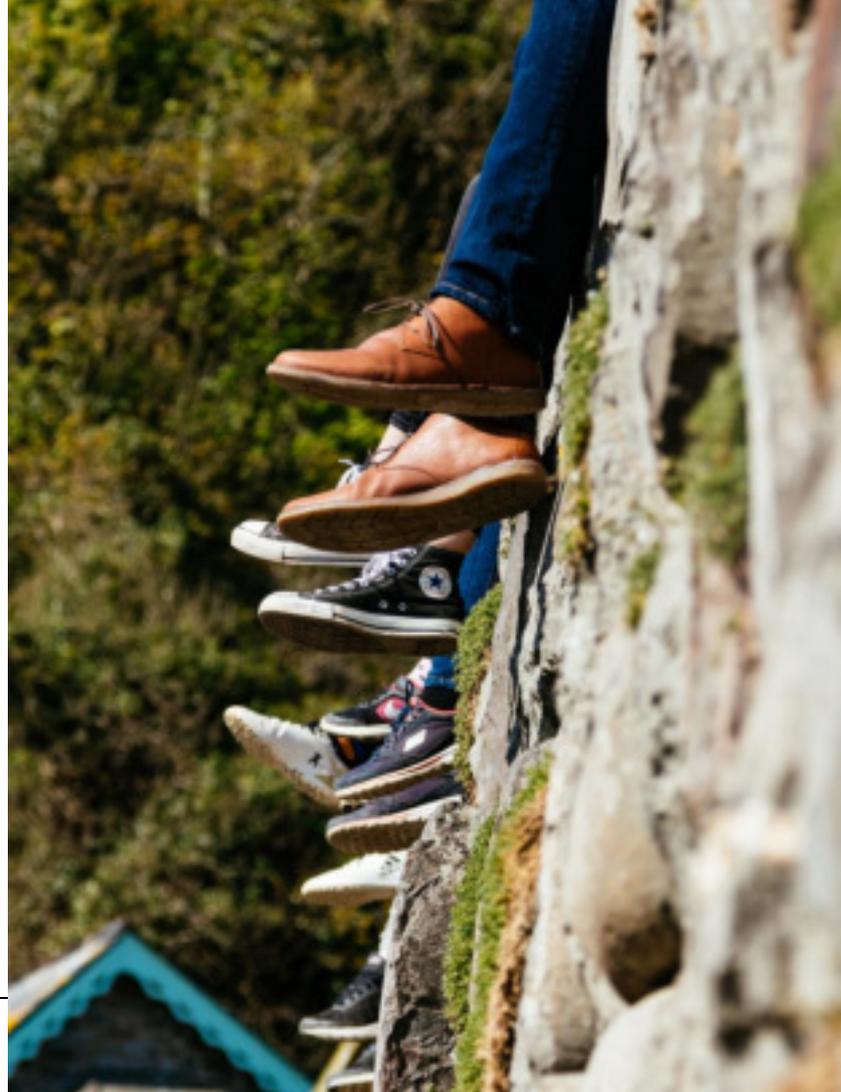

Let's do this together!

How this plan works

This plan is built on the public authorities' advice: **Keep physical distance, Hygiene first, Safety rules, and Behavioural adjustments.**

Here we will explain **our specific approach.** In implementing these measures, Impact Hub Bucharest works closely together with our cleaning staff and our landlords.

We keep **updating our safety rules** according to the public authorities' recommendations.

Keep physical distance.

01. While working, always keep a **1.5 meter distance** from each other's desks (please keep the new space layout in place).

02. Try not to switch your desk during the day and stick with the one you choose in the morning.

03. Never exceed the **maximum number of people** recommended for meeting rooms, as well as other common areas, as displayed on the entrance to the room.

Hygiene first.

01. All our spaces are provided with disinfectants. We **clean the spaces daily and weekly disinfect using nebuliser kits.** Extra disinfectants are available, so you can also clean your workspace whenever needed.

02. Frequently used **touchpoints will be cleaned** multiple times a day by our cleaning staff.

03. We advise you to bring your own water bottle to the hub. Regular dishes will **only be handled in the dishwasher.**

Safety rules.

01.

The entrance to the hub/building will be subject to **mandatory temperature screening**.

02.

In case you show **symptoms**, such as coughing, sneezing or fever, we kindly ask you to stay at home in isolation and/or consult your doctor.

03.

Please **take responsibility** for yourself and the space. **Wear a mask** while indoor (we will continue adapting this rule as new regulation will be recommended).

Behavioural adjustments.

01. Use the Impact Hub reception entrance when you arrive in the space for check-in.

02. Keeping the community spirit alive means keeping it safe. Socializing will continue, however some physical distancing is not always bad. We recommend about 1.5m :)

03. Being responsible for yourself also means that you're taking care of the entire community as well. 😊

The New Normal Workday

01. The day always starts with coffee. ☺ Don't worry the espresso machines are as good as always. All high-touch areas, such as the espresso machine, are equipped with disinfectant wipes.

02. Before you are out of your pyjamas, the space has already been thoroughly cleaned over night. An additional shift will maintain the space throughout the day.

03. When you arrive at the hub, make sure to stop by the reception for temperature screening and check-in.

04. When you choose your desk for the day, remember that you can find cleaning kits at the reception that can help you clean your desk whenever needed.

05. You have a new friend called physical distance - all desks have been moved to a minimum 1.5m distance between individuals, including lunch areas / cafeterias.

06. Is it lunchtime already? The community kitchen has been equipped with extra single use cutlery, plates and glasses.

07. Feeling alone? You can always have a chat with a friend. But don't get too close to each other. ☺

08. Take a break ☺ The landlords of our buildings are also making adjustments to the cleaning routines and ventilation systems.

09. Now take a deep breath! We increased the number of green plants inside each location to ensure freshness of air.

10. Safely return home at the end of the day. To get from home to Impact Hub and back, choose your mode of transport wisely.

THANK YOU!

For any questions regarding this protocol, please contact us at contact@impacthub.ro or ask the hosts in your location.
